

Principal's Message – 31st August, 2020

Dear parents and students,

I am sure in these days of Covid you are taking all precautions and guidelines given by the government to stay safe and sound.

Online learning has been going on for some time and now many schools have started online exams. We too are going to start. There has been a lot of confusion and debates; for and against. Big controversy was for tuition fee; let us keep these aside for a while and concentrate on exams. Most of our school children are taking online classes. I am happy about it.

Why exams -

We are not sure of the guideline and the future but one thing I am sure is that board exam will be there and we should be ready and also the school exams. If we are ready even with online education and when the school starts a quick revision can be done and go ahead with classroom studies, otherwise it will be too late for your children.

Coming to the fees, we know problems are there for the parents, business has not started, trying to meet ends together but all the same, there are parents who can afford to pay - so the request remains.

I am grateful to a small number of parents who have understood us and helped us. May god bless you for your cooperation, generosity and vision.

Stay safe, stay healthy, take care.

God bless you all

Fr. Jose K. Thomas
